

The **R** **C** Flyer

June 1988

The Newsletter of the *Manned Space Center Radio Control Club*

PILOT TO CREW...

By now our return "Fun-fly" with the Prop Nuts will be over. As in the past, it will have been a fun day with a lot of "good eats" at hand and good friendship. To the silent club member who sent me a letter addressing the friendship (or lack of) in our club, you need to attend one of our many joint "Fun-fly / cook-out" events with the Prop Nuts. I think you will find a lot of smiles, handshakes and friendship.

Our scale contest is fast approaching. We can always use volunteers. Come out and see some great planes (on the ground and in the air), have a hamburger or two, take a chance on the raffles and have a good time. You are the club and you make it what it is. See you all there!!!

Dennis R. Smerz

**DON'T FORGET
OUR SCALE
CONTEST**
CO-SPONSORED WITH THE PROP NUTS
THIS SAT. & SUN.
JUNE 4th & 5th
at the PROP NUTS' field
-- volunteer workers still needed --

**NEXT MEETING
THURSDAY
JUNE 9th, 1988
at 7:30**

in the Clear Lake Park Building

NOTICE

It is my sad duty to report the passing of long time club members Morie Morris and Clay Bergman.

Morie was pit crew for her husband Owen Morris and was a regular worker at MSC contests and activities.

Several years ago Circus Circus sponsored a cross country R/C team race for the benefit of that year's Muscular Dystrophy drive. John Kiker, Owen, Morie and two other club members represented MSC. Morie drove the pace car and kept fliers, planes and radios properly supported over the 200 mile course. Our team came in second. This was only one of the many activities Morie shared with us.

Clay Bergman was probably not known to new members since his health prevented Clay from being active over the last five years. Clay was a regular sight at the field until his heart condition ultimately restricted him to his home.

Both are very much missed. I and my fellow officers and club members extend our deepest sympathy to Morie's and Clay's families.

David Hoffman
